| <div><div> <a href="#">alghaibb</a></div><div> <a href="#">mahmoud-jaderi</a></div></div> |   |                                    |
| Summary   | Full Stack Developer with strong foundation in modern web technologies and proven ability to work effectively in team environments. Completed intensive 6-month bootcamp with progressive skill development: collaborated on HTML/CSS/JavaScript group projects, contributed to full-stack database applications, and independently built React.js applications with TypeScript and Tailwind CSS. Developed 4+ portfolio projects including a PWA event management platform, AI-powered resume builder, and automated invoicing system. Experience with Next.js, TypeScript, React, PostgreSQL, Prisma ORM, and Auth.js. Demonstrated ability to implement real-time features, AI integrations, and responsive design. Committed to writing clean, maintainable code and continuous learning. Excited to contribute technical skills and collaborative mindset to a development team while growing professionally.  |                                    |
| Education   | Monash University<br>Web Development  | Aug 2023 – Feb 2024<br>Certificate |
| Certifications  | Web Development<br>Monash University<br><a href="https://www.credly.com/badges/47bcef35-664d-41ed-9b45-03d981b441f5">https://www.credly.com/badges/47bcef35-664d-41ed-9b45-03d981b441f5</a>   | Feb 13, 2024                       |
| Projects  | <div><div><div><div>Kick Back</div><div>Jul 4 – Present</div></div><div><p>Built a comprehensive event management PWA using Next.js 15 with TypeScript for type safety and modern React features. Implemented real-time experience through React Query polling as an alternative to WebSockets, providing live updates when event details change. Used PostgreSQL with Prisma ORM for robust data management and Auth.js for secure authentication with multiple providers. Created service workers for offline functionality and push notifications, enabling users to access the platform without internet connection. Developed a complete admin dashboard with complex state management for event organizers to manage attendees, schedules, and automated reminders.</p><p><a href="https://kick-back.vercel.app">https://kick-back.vercel.app</a></p><p><b>Tech Stack &amp; Usage:</b></p><ul style="list-style-type: none"><li><b>Next.js 15 + TypeScript:</b> Built full-stack application with type safety and modern React features</li><li><b>React Query:</b> Implemented intelligent polling for real-time-like experience without WebSocket complexity</li><li><b>PostgreSQL + Prisma ORM:</b> Designed relational database schema for events, users, and relationships</li><li><b>Auth.js:</b> Integrated secure authentication with email/password and social providers</li><li><b>PWA (Service Workers):</b> Added offline support and push notifications for mobile-like experience</li><li><b>Tailwind CSS:</b> Created responsive design that works across all devices</li></ul></div></div></div> <div><div><div>Invoice</div><div>Feb 2025 – May 2025</div></div><div><p>Developed a full-stack invoicing platform to replace expensive monthly subscription services. Built using Next.js with heavy emphasis on Server Actions for type-safe server-side operations and seamless form handling. Integrated Resend API for reliable email automation and invoice delivery, implementing proper domain authentication to prevent spam filtering. Used Prisma ORM with PostgreSQL for robust data management and React-PDF for dynamic invoice generation with custom templates. Created comprehensive client management system with payment tracking and automated reminder emails.</p><p><a href="https://invoice.vercel.app">https://invoice.vercel.app</a></p><p><b>Tech Stack &amp; Usage:</b></p><ul style="list-style-type: none"><li><b>Next.js + TypeScript:</b> Built type-safe full-stack application with modern React patterns</li><li><b>Server Actions:</b> Leveraged extensively for seamless data mutations and form submissions</li><li><b>PostgreSQL + Prisma ORM:</b> Designed database schema for invoices, clients, and payment tracking</li><li><b>Resend API:</b> Integrated email automation for invoice delivery and payment reminders</li><li><b>React-PDF:</b> Implemented dynamic PDF generation with custom invoice templates</li><li><b>Shadcn UI + Tailwind:</b> Created professional, consistent user interface</li></ul></div></div> |                                    |

CVisionary

Nov 2024 – Feb 2025

Created an AI-powered resume builder that combines OpenAI GPT-4 integration with real-time preview and auto-save functionality. Implemented context-aware prompts and content validation algorithms to ensure AI-generated content is relevant and professional. Built real-time state synchronization between editor and preview components with debounced updates for optimal performance. Developed intelligent auto-save system that triggers on content changes with proper loading states and conflict resolution. Used browser's print-to-PDF functionality for instant document generation.

<https://cvisionary.vercel.app>

**Tech Stack & Usage:**

- Next.js + TypeScript:** Built responsive and interactive user experience
- OpenAI GPT-4:** Integrated AI content generation with context-aware prompts
- React State Management:** Implemented real-time preview synchronization with debounced updates
- Auto-save System:** Built intelligent saving functionality to prevent data loss
- Browser Print API:** Used for instant PDF generation without external dependencies
- Prisma + PostgreSQL:** Stored user data and resume content securely

Next.js Auth Starter

Jun 2024 – Aug 2025

Developed a production-ready Next.js starter template that eliminates time-consuming authentication setup. Built comprehensive authentication system with Auth.js supporting multiple providers, email verification, and password reset workflows. Implemented CSRF protection, secure session handling, and input validation for enterprise-level security. Created modular email system with template support and error handling for reliable user communication. Designed intuitive setup process with comprehensive documentation and environment configuration templates.

<https://github.com/alghaibb/nextjs-auth-starter>

**Tech Stack & Usage:**

- Next.js + TypeScript:** Built secure, type-safe authentication foundation
- Auth.js (NextAuth):** Implemented multi-provider authentication with session management
- PostgreSQL + Prisma ORM:** Designed user and session data schema
- Email System:** Built modular email verification and password reset workflows
- Shadcn UI:** Created modern, accessible authentication interfaces

Sumz

Oct 2023 – Oct 2023

Built an open-source article summarizer using RapidAPI's Article Extractor and Summarizer service to address information overload. Implemented Redux Toolkit Query (RTK Query) for efficient API state management and caching. Created URL processing to extract article content and generate intelligent summaries while maintaining key insights and context. Built history tracking system with search and organization features for user convenience. Developed clean, responsive interface optimized for mobile reading experience using Vite and React.

<https://ai-summarizer-xi-lilac.vercel.app/>

**Tech Stack & Usage:**

- Vite + React:** Built fast, modern development environment with interactive UI
- Redux Toolkit Query (RTK Query):** Implemented efficient API state management with automatic caching and loading states
- RapidAPI:** Integrated third-party article extraction and summarization service
- JavaScript:** Implemented URL processing and content extraction
- Tailwind CSS:** Created responsive, mobile-optimized interface
- API Integration:** Built robust error handling and rate limiting for external API calls
- History System:** Implemented local storage for summary history and search functionality
